The catalogue presents an annotated list of crop wild relatives (CWR) occurring in the Karachay-Cherkess Republic. The list contains information on the distribution and habitats of 514 CWR species over the Republic's territory and on their ranking groups according to their agricultural value and economic significance. Special sections have been allotted to the species from the Red Data Books (with their conservation status indicated) as well as to endemic CWR species and those preserved in the Teberda Nature Reserve. The catalogue is addressed to experts in the fields of crop science, botany and plant geography.
