Mejores mercados, mejores sistemas alimentarios

(24 pp., available only in Spanish)
Boletín de agricultura familiar para América Latina y el Caribe, No. 17

Forest & Landscape Restoration Mechanism: restoring landscapes for enhanced livelihoods

A set of three titles for supporting forest and land managers, extensionists, government officials and development partners together with farmer associations, community and indigenous peoples groups, smallholders, entrepreneurs and civil society.

Good practice 1: Mechanized micro-catchments for water harvesting in degraded rangelands

(2 pp.)

Good practice 2: Combating sand encroachment in drylands

(2 pp.)

Good practice 3: Combating desertification through the use of unconventional water resources

(2 pp.)

NEW BOOKS AND BRIEFS

AGRICULTURE

Review of the current agricultural trade policy in the post-Soviet countries, 2015-2016

An analysis of import and export dynamics, an overview of countries' participation in trade agreements and a summary of support provided to agricultural producers, this publication promotes transparency in agricultural trade policy measures.
(154 pp., available only in Russian)

ANIMAL PRODUCTION AND HEALTH

Lumpy skin disease: a field manual for veterinarians

To assist veterinarians in Europe and the Near East faced with lumpy skin disease (LSD) for the first time, this manual provides a clinical presentation of LSD, including transmission routes and prevention and control. (60 pp.) Animal Production and Health Manual

FOOD SECURITY AND NUTRITION

Informe de Diagnóstico Institucional del Plan para la seguridad alimentaria, nutrición y erradicación del hambre de la CELAC 2025

This review of the CELAC Plan for improving food security and nutrition, based on experience in Chile, identifies gaps (e.g. lack of institutional coordination) and makes recommendations (e.g. stronger monitoring) to improve integration into domestic policies. (132 pp., available only in Spanish)

FORESTRY

Agroforestería para la restauración del paisaje

A demonstration of agroforestry's value for both restoration of degraded lands and improvement of livelihoods, notably by reducing soil erosion, increasing water availability and generating income. (28 pp., available only in Spanish)

The role of forest smallholders and their organizations in a changing climate

A review of the ways in which forest producer organizations in developing countries contribute to climate change mitigation and adaptation, including through forest conservation, sustainable biofuel production and capacity building. (24 pp.)

Global forest land-use change from 1990 to 2010: an update to a global remote sensing survey of forests

An update on the extent of forest-land and changes in forest land use for the time period 1990–2010, taking into account fresh analysis and satellite imagery for sites previously lacking data. (14 pp.) Forest Resources Assessment Working Paper

GENDER

Développer des chaînes de valeur sensibles au genre

Concrete guiding principles to raise awareness on the benefits of integrating gender concerns (e.g. access to productive resources, women's power and agency) into all levels of the value chain. Now available in French. (52 pp., also available in [English](#))
